Reading: Final Project Submission Guidelines and Deliverables

Estimated Time: 5 minutes

You have completed a series of hands-on labs that applied key SQL and data manipulation concepts using Jupyter Notebooks. These labs covered tasks such as writing SQL queries, working with databases, and understanding how SQL integrates into the data science workflow.

The final task of this capstone project is to create a presentation that summarizes the results of all tasks completed in the previous modules and labs.

Download the Microsoft PowerPoint presentation template from the link below:

Data Science Capstone PowerPoint template

Note: If you do not have a desktop version then follow the instructions from the previous lab to get access to PowerPoint online.

1. Complete the slides with all relevant details, and feel free to add additional slides, charts, and tables as needed.
2. Add any additional unused charts or tables to the appendix that you think are relevant to your analysis.

   Note: You may add a text box to the master slide and use it as a watermark on all slides to help prevent plagiarism.
3. After completing the PowerPoint presentation, convert it to PDF format and name the file **Data Science Capstone Project Report.**

How can you submit the deliverables

You can submit your project deliverables in one of the following ways:

- **Option 1: AI-Graded Submission and Evaluation**
  - Complete all the notebooks and the presentation.
  - After finishing, convert the PowerPoint presentation into PDF format..
  - Submit the downloaded file for **AI-based evaluation**.
  - Once submitted, you will receive **automated grades instantly**.
- **Option 2: Peer-Graded Submission and Evaluation**
  - Complete all the notebooks and the presentation.
  - Upload your PDF for peer review.

  In this option, you will receive your grades based on the evaluation from other peers.

*We recommend using **Option 1 for faster grading**. However, if you experience difficulties with this method or cannot access it, you may choose Option 2 instead.*

Note: You are required to choose only one submission option — either AI-Graded or Peer-Graded, and not both, to receive grades for the final assignment.
